Digitalizing flavour

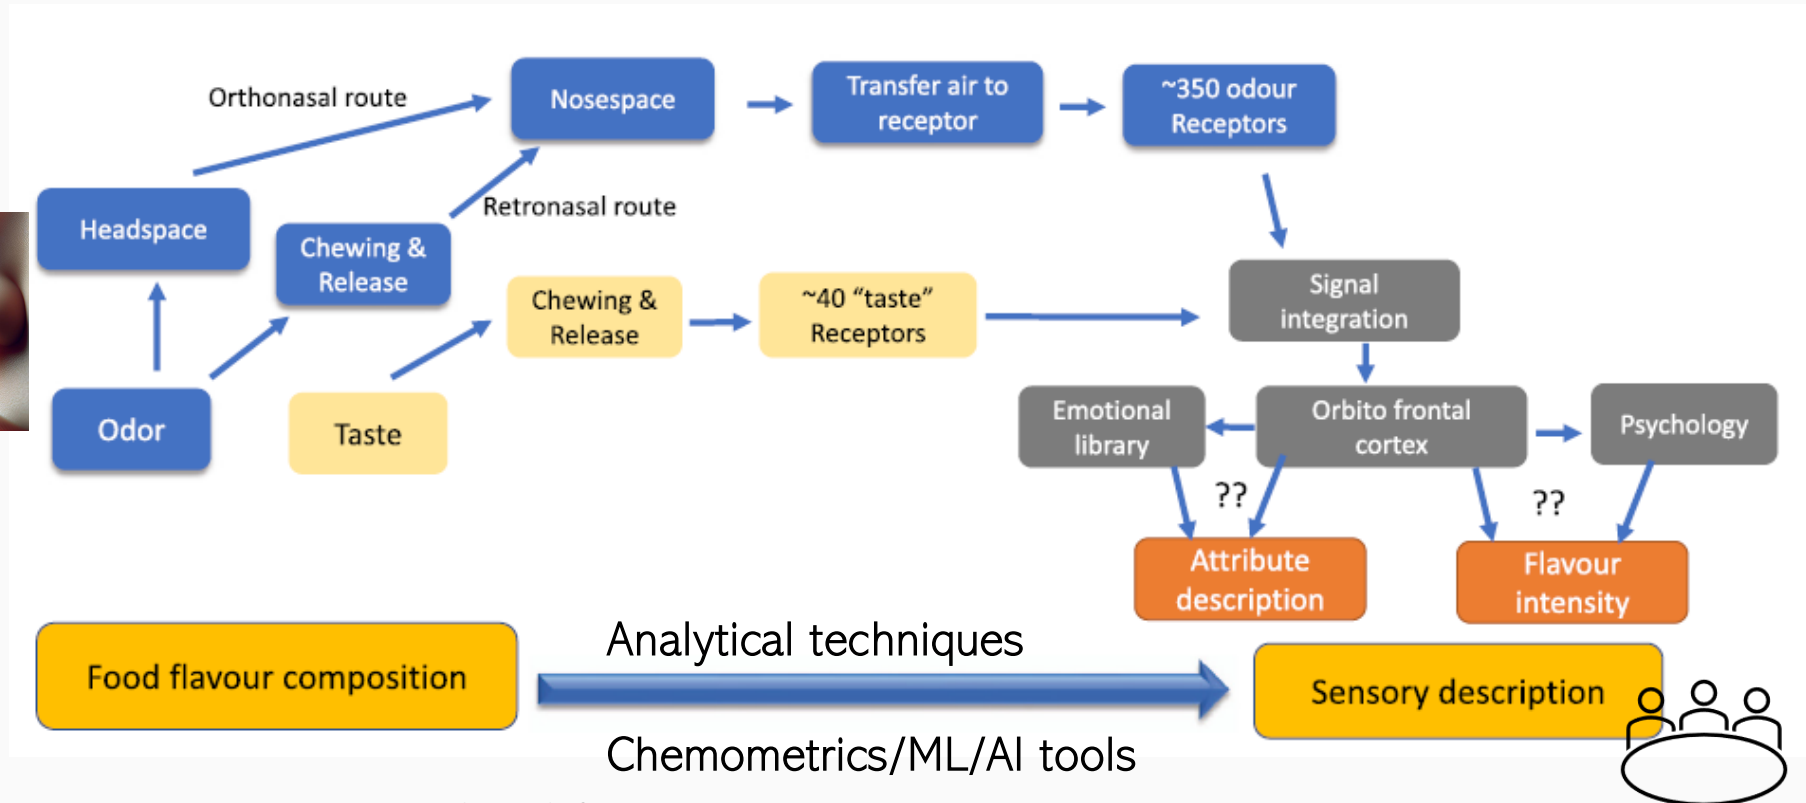

Taylor, A.J. (2023) Chapter 9: Predicting sensory properties from chemical profiles, the ultimate flavour puzzle. In: Digital Sensory Science, Woodhead Publishing.

FROM FOOD FLAVOUR TO SENSORY PERCEPTION

Digitalizing flavour: why is this relevant?

To optimize food products design and processing
To better understand and control off-flavour formation

Taylor, A.J. (2023) Chapter 9: Predicting sensory properties from chemical profiles, the ultimate flavour puzzle. In: Digital Sensory Science, Woodhead Publishing.

NEUROSCIENCE

A principal odor map unifies diverse tasks in olfactory perception

Brian K. Lee^{1,†}, Emily J. Mayhew^{2,3,†}, Benjamin Sanchez-Lengeling¹, Jennifer N. Wei¹, Wesley W. Qian^{4,1,5}, Kelsie A. Little², Matthew Andres², Britney B. Nguyen², Theresa Moly², Jacob Yasonik^{4,1}, Jane K. Parker⁶, Richard C. Gerkin^{4,1,7}, Joel D. Mainland^{2,8,*}, Alexander B. Wiltschko^{4,1,*}

Mapping molecular structure to odor perception is a key challenge in olfaction. We used graph neural networks to generate a principal odor map (POM) that preserves perceptual relationships and enables odor quality prediction for previously uncharacterized odorants. The model was as reliable as a

- Challenges:**
- 🗨 Unstructured data: mainly as text, but also in tables and figures.
 - 🗨 Symbols and Greek letters are often present in chemical names.
 - 🗨 Compound names are not unique

CASE-STUDY: WINE PROJECT

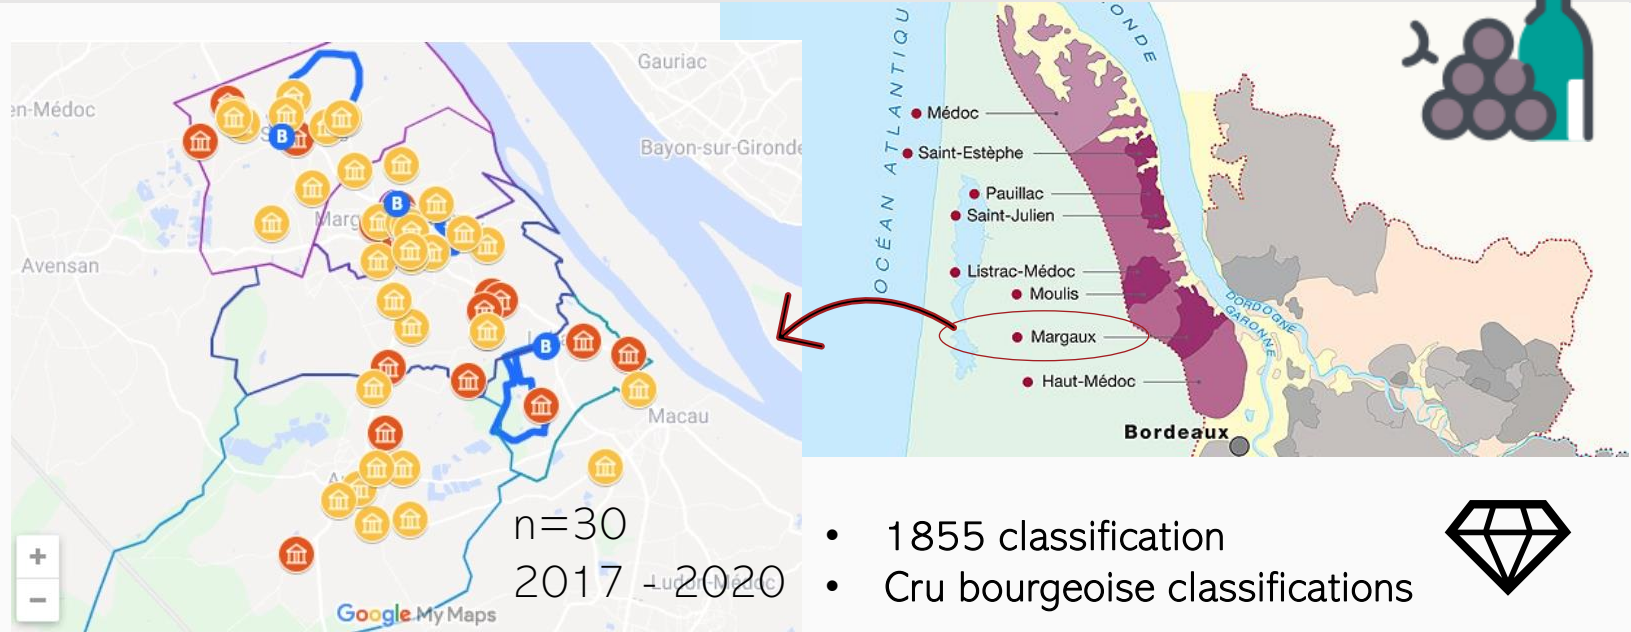

Preliminary study (Hjertholm/Götz et al., submitted for publication)
Frederikke Hjertholm's flash presentation

CASE-STUDY: WINE PROJECT

The Margaux wine project

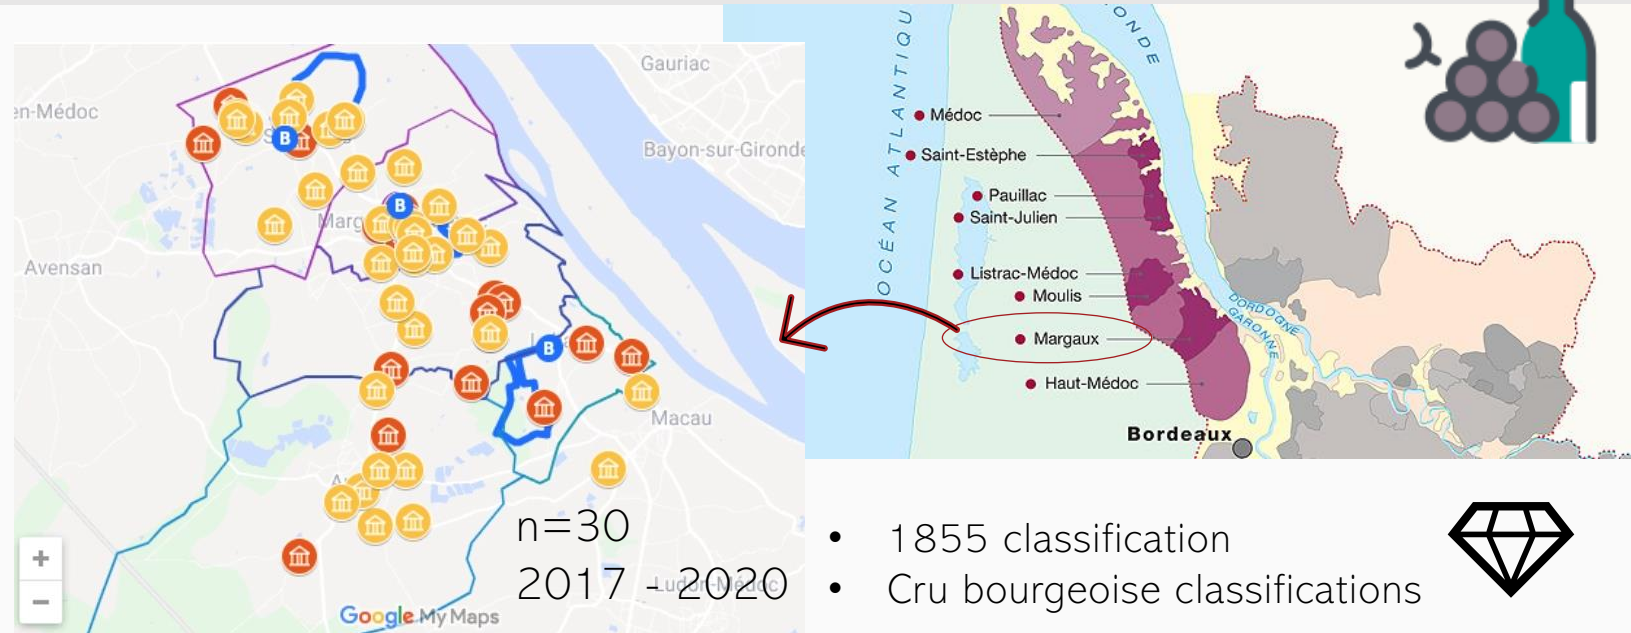

- 1855 classification
- Cru bourgeoise classifications

+ Non-alcoholic wines (*Frederikke's PhD*)

CASE-STUDY: WINE PROJECT

The Margaux wine project

- 1855 classification
- Cru bourgeoise classifications

+ Non-alcoholic wines (*Frederikke's PhD*)

Analytical measurements:

Volatile profile: GC-MS and PTR-TOF

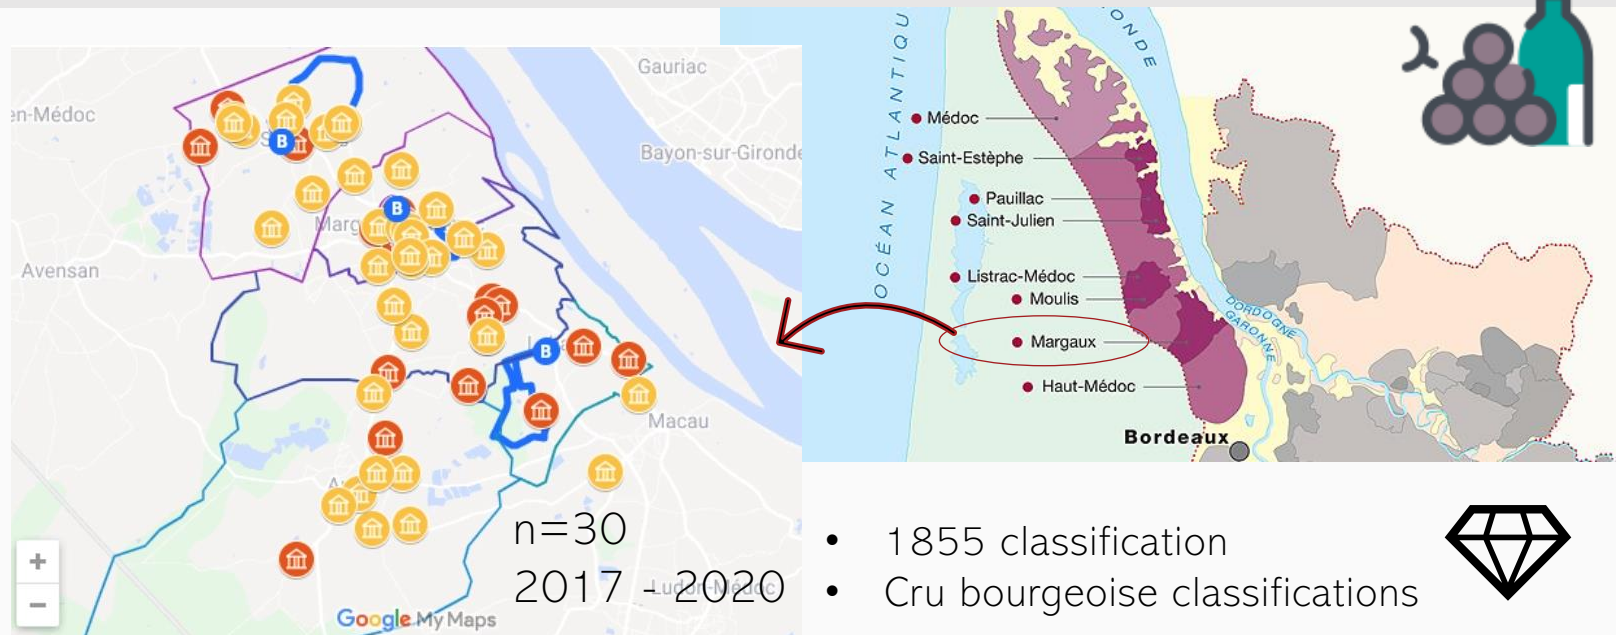

Phenolic composition: LC-HRMS and EEM

Metabolites composition: NMR

General quality control physicochemical parameters: FTIR (Winescan®, Foss, Hillerød DK)
